

Osage Park is a “vest pocket park” of .2 acres at 17008 Osage Avenue. The Southern California Edison Company reimbursed the City for one-half of the total cost of acquisition to serve the needs of local residents. It was officially acquired on January 30, 1973 and was named for its street location. The park is in close proximity to the 405 San Diego Freeway. It has a swing set and children’s play equipment (a slide, rubberized play surface and two small horses) which is part of the 1996 Proposition A Grant Funding. This park also has a gazebo with a picnic table inside.
